

Medical Protective/ Electronic Healthcare Record

Medical Protective underwriters have introduced a physicians premium credit of 2.5% for an approved EHR program.

The system must meet some basic criteria including certification by the *Certification Commission for Healthcare Information Technology*, program in place for at least twelve months and 90% of your staff using the system as part of their daily activities.

If approved, the credit will take effect at the next renewal and will be applicable for three years.

To gain approval, an application has been prepared by Medical Protective and upon request the *EHR Implementation & Management Questionnaire* will be provided.

Medical Protective will mail the packet of information directly to your attention.

Please advise me and we will secure for you.
